Thanks, Craig!

I think the bullets look good. Although in talking with David, he was concerned that the formation of a CAG or any other DTSC CI-lead forum may take a very long time to form. Therefore, I'm asking again, if we could consider narrowly-focused TASC ideas (EPA-lead aspect of site only). Would it really lead to divisive community issues, if the community is not that divided on EPA-lead work? I know you both said that because of the stage of EPA (i.e. no documents to review currently), that you couldn't even think of what the community could propose for the TASC but, David contends that there are some relevant topics that should at least be considered by us.

So I guess we're proposing a dual-pronged approach - what you've bulleted and also the narrowly-focused offering of TASC.

Thoughts?

Dana - Thanks for meeting with Nicole and I today. Based on our meeting, here are some draft bullets for your consideration for how to best use TASC at SSFL.

Thanks,

Craig
